14 Training & Learning (LMS)

15 AI & Automation

16 Integrations & Platform

Availability of some features depends on your plan (Basic, Standard or Enterprise) and selected add-ons. Contact our team to confirm what is included in your package.

01 Compensation Plans & Engine

Configurable Compensations
Change rates, criteria and limits without disrupting payouts.

Multiple Compensations
Run sponsor, level and e-commerce bonuses side by side.

Custom Payout Structures
Build rules for Binary, Matrix, Unilevel, Stair-step, Monoline, Party and Hybrid.

Automated Commission System
Real-time, error-free payouts across all plans.

Board Plan Module
Run a board plan where members fill a board and earn when it completes. The system handles board filling, splitting, cycles and re-entry automatically. Payouts are made on time without any manual work.

Generation Plan
Pay commissions across many levels of the downline. Each level has its own rate, so leaders earn from the team they build. The system calculates every payout for you.

Mobile Recharge Plan
Let members earn by recharging mobile balance through the platform. Every recharge counts toward commissions and network growth. It creates steady repeat income for your business.

Australian Binary Plan
Use the Australian (X-Up) style of binary plan, where members are placed in a fixed pattern and earn as the team grows. The system handles placement and commission rules automatically. It suits businesses that want a different binary style.

Party Plan Event and Booking Management
Create and manage sales parties, bookings and guest lists. Track the products sold at each event and pay commissions to hosts and sellers. It works for both in-person and online events.

Package-Wise Commission Logic
Set different commission rules for each membership package. Higher packages can earn higher rewards. The system applies the right rule to every member.

Cycle and Milestone Triggers
Start a payout or reward when a member completes a cycle or reaches a milestone. Admins choose the trigger points. It makes rewards automatic and on time.

Binary Plan Engine
Run a two-leg plan with pairing, carry-forward and caps. The system matches left and right volume for you. Payouts are calculated automatically.

Matrix Plan Engine
Set a fixed width and depth for your team structure. Members earn by level as the matrix fills. Rules are easy to change.

Unilevel Plan Engine
Let members enroll unlimited people on the first level. Commissions are paid by level depth. It is simple to run and easy to explain.

Monoline Plan Engine
Place all members in one straight line and share rewards by position. Every member gets a fair turn. The system handles the order automatically.

Stair-Step Breakaway Plan
Pay leaders on rank and team volume, with teams that break away as they grow. Override payouts are calculated for you. It rewards leaders who build leaders.

Hybrid Plan Engine
Combine parts of Binary, Matrix and Generation plans in one plan. Build a payout model that fits your business. Change it any time.

Payout Cycle Control
Run payouts daily, weekly or monthly. Admins choose the schedule and cut-off time. Members always know when they will be paid.

02 Bonuses & Commissions

Pairing Bonus
Pay a bonus when a member builds matching sales on both the left and right legs. The system checks both legs and pays automatically. This rewards balanced team growth.

Matching Bonus
Pay members a share of the earnings of the people they sponsored. Admins can set the levels and rates. This encourages leaders to help their team earn more.

Fast Start Bonus
Give new members an extra reward for good results in their first days or weeks. Admins set the time limit and the target. It helps new distributors start strong.

Performance Bonus
Reward members who reach set sales or team targets. Admins can set the targets by period and by amount. It pushes the team to perform better.

Repurchase Commission
Pay commission when members buy products again. Admins set the percentage and the type of commission. It supports steady, long-term sales.

Company Pool Bonus
Put a percentage of sales into a pool and share it with qualified members. Admins decide who qualifies. It rewards the whole team.

Commission Hold and Release
Hold commissions until KYC, returns or checks are done. Release them with one click. It protects your business from payout mistakes.

Commission Deductions
Take admin fees, service charges or TDS from commissions. Set them once or on a schedule. Members see every deduction clearly.

Sponsor Bonus
Reward members for bringing new people into the business. The bonus is paid as soon as the new member joins. It keeps your team motivated to recruit.

Rank Bonus
Pay an extra bonus when a member reaches a new rank. Admins decide the rank and the bonus amount. It makes every promotion feel rewarding.

Infinity Bonus
Pay leaders a small bonus on sales from deep inside their team, with no level limit. The system finds the right members and pays them automatically. It rewards long-term leaders.

Level Commission
Pay commission based on the level of the member in the downline and the package they bought. Each level can have its own rate. It gives you full control over how deep payouts go.

Royalty Bonus
Share part of company turnover with top rank holders. Admins set the rank and percentage. It rewards your best leaders.

Cycle Bonus
Pay a reward each time a member completes a board or matrix cycle. The system tracks every cycle. It encourages steady growth.

Commission Reversal
Reverse a commission when an order is refunded. The wallet and reports update at once. Accounts stay clean and correct.

03 Binary Controls & Volume

Leg Balancing Tools
Help members keep their left and right legs balanced. This stops lost commissions caused by one weak leg. Members can see where to place new people.

Binary Capping
Set a limit on how much a member can earn in a day, week or month. The limit can be based on volume or on commission. It keeps total payouts safe for the company.

Spillover Placement Rules
Choose where a new member is placed when the sponsor's chosen spot is full. For example, fill the weaker leg first or alternate left and right. The rules apply automatically.

Carry-Forward and Flush Setting
Choose whether unmatched volume moves to the next cycle or is cleared. The system applies your choice in every commission run. This gives you control over your plan's cost.

Weaker-Leg Commission Logic
Calculate commission on the leg with the lower volume. The extra volume on the stronger leg is carried forward. This keeps the plan fair and balanced.

PV Blocking for Inactive Users
Stop point value (PV) from adding up for members who are inactive. Only active members count in the commission calculation. This keeps payouts clean and fair.

Dynamic Compression
Skip inactive members so qualified uplines still earn. The system compresses the tree during commission runs. It keeps payouts fair.

Active Status Rules
Set the minimum monthly purchase a member needs to stay eligible. Inactive members are marked automatically. It keeps commissions tied to real sales.

Left and Right Placement Preference
Let the admin or each member choose a left, right or no-preference placement. It can be set for the whole system or for each user. This gives members control over how their tree grows.

Advanced PV History Report
See a full record of how point value has been added over time. Filter by member, date or type. It helps admins check and explain every commission.

Personal and Group Volume Tracking
Track each member's own volume and their team volume. Volume updates when orders are placed. Ranks and bonuses use the same numbers.

04 Packages, Membership & Autoship

Configurable Enrollment Fees
Set joining packages, pricing and frequency.

Member Self Package Upgrade
Let members upgrade their own package from their account. The system recalculates their benefits right away. This saves time for both members and admins.

Auto Membership Reactivation
Let members renew their membership using their e-wallet balance. No support request is needed. It keeps members active and reduces admin work.

Package and Rank Overview
Show members their current package and rank on the dashboard. They can see where they stand at a glance. It keeps them informed and motivated.

Free and Paid Membership Tiers
Offer free sign-ups next to paid packages. Members can upgrade when they are ready. It makes joining easy.

Autoship and Recurring Subscription
Let members subscribe to products or packages that renew automatically. Payments and orders happen on schedule without extra steps. It builds steady monthly income.

Manual Package Upgrade by Admin
Let admins upgrade a member's package from the back office. This is useful for special cases or corrections. All changes are recorded.

Package and Product Management
Create, edit and manage membership packages and products in one place. Set prices, points and benefits for each one. Changes apply across the system.

Custom User ID Formats
Choose auto-generated, serial, name-based or custom member IDs. Admins set the pattern once. Every new member gets a clean, unique ID.

05 Genealogy & Network Views

Change Sponsor & Repositioning
Move members with auto-updated ranks and bonuses.

Multiple Network View
Tree, tabular and grouped layouts.

Downline and Upline Listing
Full hierarchy lists with messaging.

Tabular Tree
View the network as a simple table instead of a tree. See names, levels, status and other details in rows. It is easy to read and search.

Unilevel and Binary List Views
Switch between a unilevel list and a binary list of your team. Each view shows the team in a different, useful way. Members choose what suits them best.

Configurable Tree Tooltips
Show helpful member details when you hover over a name in the tree. Admins choose which details to show. You get quick information without opening each profile.

Blocked User Highlighting
Show blocked members in a clear way inside the tree. Admins can spot them quickly and act. It saves time and prevents mistakes.

Member Search and Overview
Find any member quickly using search. See their profile, team and activity in one view. It saves time for admins and users.

Downline & Network Control
Manage very large networks in real time.

Sponsored Members Listing
Personally sponsored members with filters.

Genealogy Tree
Dynamic, expandable downline tree.

Sponsor Tree
View the network based on who sponsored whom. It shows the real recruiting line of each member. This helps with mentoring and tracking.

Expandable Tree
Open more of a large tree with a simple "More" button. Big networks load faster and are easier to explore. It keeps the tree smooth even with many members.

Tree Icons, Badges and Colours
Change how members look in the tree using icons, badges and colours. They can show rank, package or status. The tree becomes easier to understand.

Add Members from the Tree
Add a new member directly from a spot in the tree. You do not need to open a separate form. It makes growing the network faster.

06 Rank, Rewards & Gamification

Custom Rules for Ranking
Multi-criteria rank logic.

Badges and Milestone Rewards
Give members badges and rewards as they reach goals. They can see their progress and what to reach next. It adds fun and keeps members active.

Rank History
See each member's current rank, past ranks and promotion dates. Admins can review it in one place. It makes rank checks easy.

Contests and Challenges
Run sales or recruiting contests for a set time. Track entries and winners automatically. It keeps your team active.

Rank Advancement
Auto-promote when targets are met.

Visual Rank Condition Builder
Build rank rules with volume, referrals and team conditions using AND/OR logic. No coding needed. Change them as your plan grows.

Leaderboards
Show top earners, recruiters and sellers to the network. Boards update on their own. It builds friendly competition.

07 E-Wallet, Payouts & Payments

E-Pin System
Secure digital pins for signups, purchases and activations.

Blockchain & Smart Payouts
Tamper-proof, traceable crypto payouts.

Automatic Payment Processing
Gateway-based collection and transfer.

Online Cryptocurrency Wallet
Store, receive and spend crypto balances.

Business Wallet
Company-level income, expense and profit tracking.

E-Pin Refund
Refund unused E-Pins when needed. The admin can process it in a few clicks. It keeps transactions fair and clear.

Voucher Wallet
Give members vouchers they can use for purchases. Admins can create and track them. It is a simple way to reward and promote.

User-Selected Payout Method
Let members choose how they want to receive money, such as bank transfer or wallet. They pick what works best for them. It improves their experience.

Unified Payout Status Page
See all payout requests and their status in one page. Admins can update the status, and members can track it. Everyone stays informed.

Real-Time Exchange Rates
Use live exchange rates for international transactions. Members see the right value in their own currency. It keeps global payments fair.

Bitcoin Payment Integration
Accept Bitcoin payments from members. The system records each payment automatically. It lets global members pay easily.

Service Charge Configuration
Set service charges on transactions such as transfers or withdrawals. Choose the amount or percentage. It helps cover costs and earn income.

Wallet Recharge Requests
Members request to add money to their wallet. Admins approve or reject in one click. The balance updates right away.

Multiple Currency Support
Transact in local currencies.

Transaction Failure and Recovery
Logged failures with instant recovery.

Multiple Payment Options
Cards, wallets, bank transfers and crypto.

Multiple Withdrawal Options
Bank, PayPal and other payout routes.

E-Wallet
Secure digital wallet for earnings and transfers.

Multiple Wallet Types
Offer different wallets for different uses, such as earnings, purchases or bonuses. Members can see each balance clearly. It keeps money organized.

ACH Bank Transfer Payouts
Pay US distributors directly to their bank accounts through ACH. Payouts are safe and familiar for US members. It makes cash-out easy.

Withdrawal Request Cancellation
Let members cancel a withdrawal request before it is processed. They do not need to contact support. It saves time for everyone.

Payout Thresholds, Fees and Approvals
Set a minimum payout amount, fees and approval steps. Admins decide when and how money is released. It gives full control over payouts.

Stripe Recurring Payments
Handle subscriptions and repeat payments through Stripe. Payments renew on time and records stay correct. It supports autoship smoothly.

ERC20 Token Integration
Connect ERC20 tokens to your platform. Use tokens for payments and rewards. It is useful for crypto-based businesses.

Member-to-Member Fund Transfer
Let members send funds to each other from their wallets. Admins can set limits and fees. Every transfer is recorded.

Admin Credit and Debit
Add or remove wallet money with a reason note. Every change is logged. It is useful for corrections and special rewards.

Wallet Ledger and Statements
See every wallet transaction with a running balance. Members can check their own history. It builds trust and cuts support questions.

Bank File Export for Payouts
Export payout batches in a file your bank accepts. Pay many members at once. It saves hours of manual work.

Payment Gateway Integrations
Connect popular payment gateways for cards and online payments. Payments are matched to orders automatically. Customers pay in their own way.

QR Code and UPI Payments
Accept fast mobile payments with a QR code or UPI. Members pay in seconds. Orders update when the payment arrives.

Split and Partial Payments
Let members pay part with wallet, e-pin or gateway and the rest another way. Every part is tracked. It makes buying easier.

E-Pin Transfer
Let members pass unused E-Pins to their team. Admins can set rules and limits. Each transfer is logged.

08 E-Commerce, Shipping & Inventory

Integrated Inventory Software
Real-time stock across vendors and warehouses.

Multi-Vendor
Multiple sellers with individual dashboards.

E-commerce Shopping Cart
Built-in or Shopify, WooCommerce, Magento and OpenCart sync.

Back-Office Order Approval
Let admins check and approve pending store orders. This gives you control over stock and payments. It stops mistakes before they happen.

OpenCart Store
Get a ready online store built on OpenCart with a base design. Sell products and link sales to commissions. It is a quick way to start selling.

Automated Onboarding on Purchase
Add new distributors automatically when they buy a starter product. No manual sign-up is needed. It speeds up growth.

Referral and Upline Reward Tracking
Track which member referred each sale. Upline rewards are calculated automatically. Everyone gets paid correctly.

Prebuilt Onboarding Templates and Links
Start fast with ready-made templates and links for new members. They are easy to share and use. It saves setup time, especially with Shopify.

Customer Management
Keep a list of your customers and their orders. See who bought what and when. It helps with support and sales.

Order Tracking Dashboard
See orders and sales performance in one dashboard. Check status, totals and trends. It keeps your store under control.

Product Variants and Attributes
Add sizes, colours and custom options to products. Each option can have its own price and stock. Shoppers pick exactly what they want.

Coupons and Discount Rules
Create percentage or fixed discounts with simple conditions. Limit them by date, product or member. It helps run promotions easily.

Gift Cards
Sell and redeem gift cards in your store. Track balance and use. It is a simple way to reward and promote.

Returns and Refund Management
Set your return policy and process refund requests. Stock and commissions update on their own. It keeps orders and money in sync.

Shipping Methods and Zones
Set shipping rates by country, weight or price. Show the right options at checkout. Delivery costs stay under control.

Multi-Warehouse Fulfilment
Ship orders from the warehouse nearest to the customer. Stock is tracked for each location. Delivery becomes faster.

Free Shipping Thresholds
Offer free shipping above an order amount. It encourages bigger baskets. Admins can change the limit any time.

Low Stock Alerts
Get an alert before a product runs out. Reorder in time and avoid lost sales. Admins see the low-stock list on the dashboard.

Guest and One-Page Checkout
Let customers buy fast on a single page, even without an account. Fewer steps mean fewer lost orders. It helps sales grow.

Starter Kits and Bundles
Sell packages of products as one joining item. Set one price and one point value. It makes enrollment simple.

Stockist and Franchise Management
Manage depots, stockists and franchises with their own stock and commissions. Admins see every location in one place. It suits businesses with local branches.

Auto-Generated Invoices
Create a branded PDF invoice for every order. Members and customers can download it. It saves time and looks professional.

Product Reviews and Ratings
Let buyers rate and review products. Admins can approve reviews before they show. It builds trust in your store.

09 Tax, KYC & Compliance

Tax Management
Automated tax by location and product category.

KYC Verification APIs
Connect with outside services to verify identity automatically. This speeds up member checking. It reduces manual work.

FTC Compliance and Income Disclosure
Use tools that help you follow FTC rules. Share clear income details with members. It helps you stay honest and protected.

Automated Data Retention Policies
Set rules for how long data is kept. Old data is removed or archived automatically. It helps with privacy laws like GDPR.

Enterprise Compliance and Governance Controls
Set up stronger controls for large businesses. Manage approvals, access and rules across the company. It suits big and regulated networks.

Geography-Based Tax Rules
Set tax rates by country, state or postcode. The right tax is added at checkout. It helps you follow local rules.

KYC Document Verification
Let members upload ID documents for checking. Admins review, approve or reject them. It helps you follow legal rules.

1099 Year-End Reporting
Create year-end tax reports for US distributors. The system gathers the earnings records you need. It makes tax time simple.

Consent Tracking
Record when members agree to your terms and policies. You can show proof when needed. It supports data privacy rules.

Distributor Activity Compliance Reports
Create reports on what distributors do in the system. Use them for checks and audits. It helps you meet local direct selling rules.

GST and VAT Support
Create tax invoices and reports in the format each region needs. Rates are applied automatically. It makes filing easier.

TDS Deduction and Reports
Deduct tax at source from commissions and keep a record. Admins and members can view the reports. It keeps payouts compliant.

10 Security & Data Protection

Track Activities
Timestamped logs of user actions.

Security & Data Control
Encryption, SSL, 2FA and fraud detection.

Login Rate Limiting and Attempt Tracking
Limit how many times someone can try to log in. Failed attempts are tracked and recorded. This helps stop attacks and misuse.

Two-Factor Authentication
Ask for a second step, like an app code, at login. Only the real user can get in. It protects accounts and money.

IP Restriction for Admin Access
Allow admin logins only from approved IP addresses. Others are blocked. It keeps your back office safe.

Admin Audit Trail
Record every change an admin makes, with time and name. Review it any time. It adds accountability to your team.

Strong Backup System
Restore to any previous point.

Transaction Password Reset
Let members and admins reset the secure password used for transactions. It can be done from the profile. This keeps accounts safe and saves support time.

OTP Verification
Send a one-time password for login or important actions. Only the real user can complete the step. It adds an extra layer of safety.

CAPTCHA Protection
Stop bots on login, sign-up and checkout pages. Real users pass quickly. It cuts spam and attacks.

Scheduled Automatic Backups
Back up your data daily or weekly on its own. Keep several restore points. You can recover from any problem.

Secure Login as Member
Let support staff open a member's account to help them. Every use is logged. Problems get solved faster and safely.

11 Reports & Analytics

Various Reporting Systems
Excel, PDF and CSV exports.

Income and Expenses Report
Per-member financial reporting.

Top Earners Report
See which members earn the most. Filter by date or period. It helps you reward and learn from your best performers.

New Member Join Report
View a list of all new members with their join date and package. Filter by date or sponsor. It keeps you updated on new sign-ups.

Package Upgrade Report
Track every package upgrade made by members. See who upgraded, when and to which package. It shows how your sales are moving up.

Sales and Income Report
Earnings by product, member or group.

Joining Graphs
See how many people joined by day, month or year. You can also view joins by region and package. It helps you understand growth patterns.

Top Recruiters Report
See which members bring in the most new people. Use it to recognize leaders and plan contests. It shows who is growing the business.

Payout Report
See all payouts made to members in one report. Filter by date, member or status. It makes finance checks easy.

Stair-Step Report
See how members are moving through the stair-step ranks. Check who qualified and who is close. It helps you plan rewards.

Monthly Revenue Report
View your total income for each month. Compare months to see growth or drops. It gives a clear picture of business health.

Member Commission and Payout Reports
Let members see their own commissions and payout releases. They can check what they earned and when it was paid. It builds trust and cuts support questions.

Referral and Business Volume Tracking
Track how many people a member referred and the sales volume they brought. See both personal and team numbers. It supports fair ranking and payouts.

Commission Report
See gross, deductions and net commission for each member and plan. Filter by date or rank. It makes payout checks simple.

Active and Inactive Member Report
See who is active and who is not. Use it to plan reactivation. It shows how well you keep members.

Scheduled Report Emails
Get key reports in your inbox on a schedule. Choose daily, weekly or monthly. You stay informed without logging in.

Fund Transfer Report
See all money moved between wallets and members. Filter by date or user. It keeps every transfer clear and trackable.

Fee and Charge Tracking
Track registration fees, commission charges, transfer fees and payout fees in one place. See how much the company earns from each. It makes finance simple.

Income Details View
Let members see a clear breakdown of their income by type. They can check each bonus and commission. It makes earnings easy to understand.

Binary Carry-Forward Report
See left and right balances, matched volume and carry-forward for each member. It makes binary payouts easy to explain.

Wallet Balance Report
See total wallet balances across the network. It shows what the company owes members. It makes finance planning easier.

Custom Report Builder
Pick fields and filters to build your own report. Save it and use it again. It fits any question you have.

12 Dashboards & Admin Tools

Multilingual Support
Instant language switching.

Theme Switcher
Dark mode and custom colors.

CMS
Drag-and-drop pages, menus and layouts.

Manage User Account
Personal dashboard for wallet, income and profile.

Dashboards & BI Analytics
Real-time KPIs and trends.

Customizable Dashboard Widgets
Choose which widgets and numbers appear on the dashboard. Admins and members can set up what matters most to them. Everyone sees a view that fits their work.

Global Admin Search
Find any admin menu or page from one search box. Press the "/" key to open it from anywhere. It makes moving around the system fast.

Unlimited Members Support
Scales without limits.

Customizable Profile Picture and Wall
Personalized member profile.

Manage User Types
Roles with distinct permissions.

Member Management
Profiles, access and status.

Month-over-Month Comparison Tiles
Show key numbers next to last month's numbers on the dashboard. You can see at once if things are rising or falling. It makes tracking easy.

AI Chatbot Assistant
Use a built-in AI helper in every admin page. Ask it questions or ask it to do tasks within your access rights. It saves time and reduces clicks.

Module Management
Turn features on or off with a simple setting. Use only what your business needs. It keeps the system clean and easy to use.

Privileged User and Employee Roles
Give your staff their own logins with limited access. Each person only sees what they need. It keeps your data safe.

Step-by-Step Onboarding Guide
Guide new admins and users through the system with simple steps. They learn the main tools quickly. It cuts training time.

Smart Export Pipeline
Send large reports to the user's inbox as a secure download link. This avoids slow downloads and crashes. Big reports are delivered safely.

Signup Form Customization
Choose which fields appear on the signup form. Collect the exact information your business needs. Each business can have its own form.

Bulk User Registration via Excel
Add many members at once using an Excel file. This is useful when moving from another system. It saves a lot of time.

Expense Management
Record company expenses by type and date. See totals by month or year. It gives a clear view of profit.

13 Communication & Marketing

Support Ticketing
Structured member support.

Lead Capture & CRM Sync
Forms that feed a CRM.

Live Chat Module
Internal real-time chat.

Email Notifications
Branded emails for key events.

Email Template Editor
Edit the look and words of system emails with an easy editor. Match them to your brand. No technical help is needed.

Internal Mail with Threads
Send messages inside the platform and keep each conversation in a thread. It is easy to follow past replies. Teams stay organized.

Auto Responder
Send automatic emails to new leads and members. Capture names and emails, then follow up on schedule. It keeps people engaged without extra work.

Mailchimp and SendGrid Integration
Connect with popular email tools to send campaigns. Use real MLM data to send the right message. It makes email marketing easy.

Intelligent Prospecting and Lead Qualification
Find and rank leads by how likely they are to join. Focus on the best ones first. It helps convert more people.

Promotional Tools
Banners, links and social invites.

Self-Replicating Distributor Websites
Personal sites with referral links.

WhatsApp Integration
Updates in WhatsApp.

SMS Integrations
Triggered, customizable SMS.

Mailgun Email Delivery
Send system emails through Mailgun for fast and reliable delivery. Track whether emails were sent. It helps important messages reach members.

Replication Page Customization
Control what appears on each member's replicated website page. Edit fields, text and content. Keep every page on brand.

Social Media One-Click Sharing
Let members share banners, links and pages on social media with one click. It helps them reach more people fast. Your brand spreads wider.

Milestone-Triggered Campaigns
Send messages automatically when a member reaches a goal. For example, a rank-up or a first sale. It makes members feel noticed.

Sales Enablement and Multi-Channel Automation
Keep all sales content in one place and share it across channels. Automate follow-ups by email, SMS and more. Teams spend more time selling.

Webinar Integration
Run webinars and training sessions for your network. Members can join and learn from anywhere. It helps with recruiting and education.

Team-Building and Engagement Tools
Give members tools to connect by voice, video and sharing. They can work together and stay loyal to the team. It builds stronger groups.

Email and SMS Template Library
Use ready-made templates for every system event. Edit the words to match your brand. Messages go out on time.

Announcements and Popup Banners
Show notices and offers when members log in. Admins control the message and timing. Important news is never missed.

Marketing Asset Library
Keep banners, brochures and videos in one place. Members download what they need. Your brand stays consistent.

Distributor Lead Manager
Let members track prospects and follow-ups in one list. They set reminders and notes. It helps them turn leads into team members.

In-App Real-Time Alerts
Show instant alerts inside the platform for things like payouts, joins and rank changes. Members see updates the moment they happen. It keeps them engaged.

Push Notifications
Send instant alerts to member phones for payouts, joins and rank changes. Members stay informed on the go. It improves engagement.

Bulk Messaging
Send a message to the whole network or to a chosen group. Filter by rank, package or country. It saves time on updates.

Landing Page Templates
Give distributors ready pages for recruiting and sales. Pick a design and share the link. It helps them start fast.

Referral QR Code
Give every member a personal QR code with their referral link. It works well at events and in print. Sign-ups are tracked to the right sponsor.

14 Training & Learning (LMS)

Learning Management System
Train your network with online courses inside the MLM platform. Members learn anytime from any device. It is white-label, so it carries your brand.

Virtual Classroom
Offer a live online classroom experience. Teachers and learners can connect and work together. It makes training feel real.

Learning Progress Tracking
See how far each member has come in their courses. Check results for single users or groups. It shows who needs help.

Refer E-Learning and Earn
Let members earn commission when people they refer join a course. They also earn from their downline's referrals. It turns learning into income.

Learning Reports
Create daily, weekly or monthly learning reports. Check how people and groups are doing. It helps improve training.

Multi-Format Course Content
Upload training in audio, video, PDF and slide formats. Sort courses in the order you want. It makes learning rich and easy.

Course Completion Certificates
Give members a certificate when they finish a course. They can share it as proof of success. It boosts motivation.

Gamified Learning
Add points, rewards and fun challenges to courses. Learners stay interested and finish more lessons. It makes training enjoyable.

Task Management and Member Training
Give members learning tasks and track whether they are done. New distributors become productive faster. It supports better onboarding.

LMS Multi-Language Switching
Offer courses in many languages. Learners switch to the language they know best. It helps you train people worldwide.

Course Pricing and Payout Model
Set prices for courses and decide how referral payouts work. Everything is calculated automatically. It lets you earn from your training content.

Document Library
Share forms, policies and guides in one safe place. Members view and download what they need. It cuts repeat questions.

News and Announcements
Publish company news inside the platform. Members read it from their dashboard. It keeps everyone informed.

FAQ and Knowledge Base
Publish answers to common questions by topic. Members find help on their own. It lowers support load.

Event Management
Create events and let members register. Send reminders and track attendance. It keeps the team connected.

Photo and Video Gallery
Show events, products and success stories in a gallery. Admins upload and organise content. It builds pride and trust.

Community Forum
Give members a place to ask questions and share tips. Admins can moderate posts. It builds a stronger community.

15 AI & Automation

AI Fusion for Smart Growth
Predictive analytics and churn alerts.

AI Sales Optimization
Get suggestions on which products and bundles to offer. AI studies buying habits to help increase sales. It raises order value.

Personalized Marketing Intelligence
Create content and product ideas that fit each member or customer. Improve email and social campaigns using real results. It makes marketing more effective.

AI Compensation Plan Simulation
Test a compensation plan before you launch it. See how much it may cost and how it may affect payouts. It helps you build a plan that is fair and safe.

Intelligent Engagement Management
Find members who are inactive and need attention. Send them better, more personal messages. It brings more people back.

Intelligent Process Automation
Let AI handle repeat tasks like onboarding steps and follow-ups. It reduces errors and saves time. Your team can focus on people.

16 Integrations & Platform

Third-Party API Integration
Payment, CRM and marketing tools.

MLM Mobile Apps
iOS and Android apps.

Enterprise ERP Integration
Link the platform with your company's ERP system. Data moves between systems without double entry. It suits large organizations.

Migration
Move from your old system with zero data loss.

Odoo ERP Integration
Connect your MLM system with Odoo for business management. Share sales, stock and accounting data. It keeps operations in one flow.

White-Label Branding
Launch the software under your own logo, domain and name. Your members only see your brand. It builds trust and recognition.

Full API Access
Connect your other systems using open APIs. Build custom workflows and share data safely. It gives you freedom to grow.

Fully Responsive Design
Use the platform on desktop, tablet and mobile with the same ease. The layout adjusts to every screen. Members can work from anywhere.

Redis Caching
Speed up the system by storing often-used data in memory. Pages and dashboards load faster. It keeps the software smooth for large networks.

Webhooks
Send events like new orders or rank changes to other systems. Your tools stay in sync. It supports custom workflows.

See it live before you decide
